

ANNUAL EDITORIAL INDEX

Within each subheading, entries appear in chronologic order. Bracketed letters indicate departments and brief items: **C**, Case of the month; **CL**, From the clinical literature; **F**, On the diagnostic frontier; **L**, Letters to the editor; **M**, Meeting highlights; **T**, Interpretation of tests. The page number follows the issue date.

Subject Index

Anatomic pathology

- Digitalis-like compound: A hypertension factor? [CL]. January, 88.
- Lack of adrenoceptors as a key to angina? [CL]. February, 83.
- Faster diagnosis of a fatal disease [CL]. June, 68.
- Growth hormone ruins diabetic control [CL]. July/August, 69.

Blood banking

- American Association of Blood Banks 36th annual meeting [M]. January, 19.
- Removing unwanted cold agglutinins from serum [T]. April, 21.
- Blood units contaminated after lengthy storage [CL]. April, 73.
- D^u and rosetting tests for FMH [T]. May, 23.
- Analyzing the Polybrene test [T]. June, 17.
- The sequelae of massive transfusion [CL]. July/August, 69.
- Behavior of reagent red blood cells [T]. September, 21.
- Stop! Transfusion reaction. September, 48.
- Therapeutic apheresis: What it can and can't do. September, 55.
- Blood component therapy [T]. October, 15.
- Is a major crossmatch essential? [T]. November/December, 17.

Chemistry

- Use of saliva in lab tests [T]. January, 17.
- Screening newborns for genetic

disease: The PKU model. January, 50.

Acute arsenic poisoning [C]. January, 71.

Immunostaining marks Merkel-cell tumors [CL]. January, 88.

ALP assay diagnoses cystic fibrosis in fetuses [CL]. January, 89.

Bilirubin fluorescence and prevention of kernicterus [F]. February, 9.

The lab's role in toxic disaster. February, 28.

Radioreceptor assays: Innovations in monitoring neuroleptic drugs. February, 37.

A look at toxicology's powerful new techniques. February, 45.

Neonatal screening—Part 2. The best way to screen for neonatal hypothyroidism. February, 67.

A new way to screen for diabetes mellitus [CL]. February, 83.

GGTP levels: A sign of cancer prognosis? [CL]. February, 83.

Neuropeptide Y as a potential tumor marker [CL]. February, 83.

An unexpected reaction to succinylcholine [C]. March, 17.

Neonatal screening—Part 3. The spectrum of metabolic disorders. March, 39.

The subtle signs of chronic vitamin undernutrition. Part 1: Fat-soluble vitamins. March, 75.

Poor estimates of blood glucose control [CL]. March, 89.

Blood glucose testing [L]. March, 101.

Scientific session of the American Heart Association: Implications for clinical labs [M]. April, 15.

Reproductive endocrinology: New

problems call for new solutions. April, 24.

From A to hCG in pregnancy testing. April, 35.

The subtle signs of chronic vitamin undernutrition. Part 2: Water-soluble vitamins. April, 61.

A fatal nephrotic syndrome [C]. May, 9.

Biochemistry of the reproductive years: The seventh annual Arnold O. Beckman Conference [M]. May, 17.

How worthwhile is screening for occult blood? May, 35.

RIA in thyroid function testing. May, 55.

Toxic time bombs: Understanding the actions of slow poisons. June, 57.

Decline in hCG predicts germ-cell cancer course [CL]. June, 67.

A new marker for hypoglycemia-like illness [CL]. June, 68.

The effects of prostaglandins. September, 37.

Magnesium suppresses parathyroid hormone [CL]. September, 66.

A new way to assess pancreatic function [CL]. September, 67.

Drug may indicate schizophrenic relapse [CL]. September, 71.

Hypercalcemia: A problem in differential diagnosis [C]. October, 9.

A disappointment with α -fetoprotein [CL]. October, 58.

Pregnancy testing [L]. October, 60.

Stat pregnancy testing [T]. November/December, 17.

Inflation of glycosated hemoglobin values [CL]. November/December, 71.

Platelet clumping and coronary artery disease [T]. October, 15.
Porphyrias: Demons in disguise? October, 20. *Continued*

Is your financing flexible?

Ours is.

Coulter flexible financing. It's affordable and efficient. It lets your laboratory meet its capital equipment needs without depleting its capital budget.

In today's atmosphere of cost-consciousness, TEFRAs, DRGs, and rapidly changing technology, the advantages of buying into a company—rather than simply buying a company's

product—is more important than ever.

While the lab director is looking for maximum results, the administrator is looking for maximum return for minimum cost. His capital equipment needs must be matched to his cash flow cycle.

Flexible financing through Coulter provides for affordable payments. Protects against product obsolescence. Lets you look at tomorrow's needs, at today's cost.

Instruments. Diagnostics. Training. Service. Financing. In one package. All from Coulter...the leader in hematology for over 25 years. Call toll-free: 800-327-6531 (In Florida 800-432-6518) Ex. 2770.

Coulter Electronics, Inc.
P.O. Box 2145, Hialeah, FL 33012-0145

Coulter... Quality Counts!

Reticulocyte recount [L]. October, 61.

Corrected count increment: A measure to detect platelet alloimmunization [C]. November/December, 8.

Acute versus chronic leukemic cells: Is phenotyping a good prognostic indicator? November/December, 20.

The anemia of the long-distance runner [CL]. November/December, 70.

Procainamide and red-cell autoimmunity [CL]. November/December, 70.

Immunology and Immunopathology

Multiple sclerosis: A clearer path to a complex diagnosis. January, 43.

Lupus anticoagulant linked to thrombosis in SLE [CL]. January, 89.

Recent diagnostic advances in cellular immunology. March, 24.

DNA probes for infectious disease. March, 62.

Automated diagnosis of immunoglobulin abnormalities [F]. April, 8.

Diagnosis and management of allergic disorders: The future is here. April, 48.

New assay use confirms glomerular disease [CL]. April, 73.

Luminescent immunoassays: New labels for an established technique. May, 44.

Serious risk in benign monoclonal gammopathy [CL]. June, 67.

CSF electrophoresis shows early MS [CL]. June, 68.

A double albumin peak on a serum protein electrophoretogram [C]. July/August, 9.

International Academy of Pathology: A variety of detection systems. July/August, 15.

Predicting response to cancer therapy. [T]. July/August, 19.

Two-dimensional electrophoresis: In search of cancer markers.

July/August, 47.

Preventing GvHD in marrow recipients [CL]. July/August, 70.

Duration of rubella vaccine protection is hard to test [CL]. September, 66.

Aplastic anemia stripping immune system? [CL]. September, 69.

ELISA on the trail of viral diseases. October, 52.

Oncogenes, proto-oncogenes, and cancer. October, 36.

Slime lowers immune response [CL]. October, 58.

Allergy diagnosis [L]. October, 60.

More probes [L]. October, 60.

Laboratory parameters of acute inflammation. November/December, 56.

Better detection of bladder cancer [CL]. November/December, 70.

Prenatal detection of congenital rubella [CL]. November/December, 70.

Prothrombin low in nephrotic syndrome [CL]. November/December, 70.

Microbiology

Number of venipuncture sites for blood cultures [T]. January, 17.

Usefulness of febrile agglutinin panels [T]. January, 17.

New *Mycobacterium* species in bacteremia [CL]. January, 89.

A cause of diarrhea in AIDS patients [C]. February, 23.

AIDS: Putting the puzzle together. February, 56.

A wealth of reports from ICAAC [M]. March, 9.

Faster detection of mycobacteremia [CL]. March, 89.

GLC detects anaerobes in ascitic fluid [CL]. March, 89.

Doorknobs: What makes brass better? [L]. March, 101.

Nasopharyngeal growths of *N. meningitidis* [T]. April, 21.

RIA highly specific in invasive aspergillosis [CL]. April, 73.

Tzanck smear revived to diagnose herpes [CL]. April, 73.

Who should draw pediatric specimens? [T]. May, 23.

From cat-scratch disease to simian AIDS: Exciting discoveries in microbiology [M]. June, 13.

Vaginal *E. coli*: How great a problem? [T]. June, 17.

Vibrio vulnificus: Neptune's revenge? June, 20.

Fast, accurate recognition of bacteremia and septicemia. June, 35.

Diagnosing urinary tract infection. June, 44.

A new test for *Giardia lamblia* [CL]. June, 67.

More accurate diagnoses in GU complaints [CL]. June, 67.

Clostridium perfringens as a cause of endocarditis [CL]. June, 68.

Detection of cytomegalovirus [T]. July/August, 19.

Parasitic infections and the compromised host. July/August, 22.

Assessing the potency of encapsulated bacteria [CL]. July/August, 69.

Viral culture averts neonatal herpes [CL]. July/August, 69.

International symposium on viruses, immunity, and immunodeficiency: AIDS and other topics [M]. September, 15.

STD—Part 1. Genital wart infections: Another sexual plague? September, 24.

Exploring the link between condyloma virus and cervical cancer. September, 31.

EIA highly specific in gonorrhea [CL]. September, 66.

Reporting routine throat cultures [T]. October, 15.

STD—Part 2. Chancroid: Not just another tropical disease. October, 32.

A simpler diagnosis for *Chlamydia* [CL]. October, 58.

Fast, accurate diagnosis of bacterial pneumonia [CL]. October, 58.

Detecting a pneumonia in AIDS patients [CL]. October, 59.

Cryptosporidiosis [L]. October, 60.

Reporting *E. coli* [L]. October, 60.

Finding the elusive *T. vaginalis*. November/December, 38.

Using DEM to diagnose pediatric viral gastroenteritis. November/December, 45.

Acridine orange stain for neonatal bacteremia [CL]. November/December, 70.

Statistics

What makes a reference range? January, 61.

To the truth tables: Predicting non-A, non-B hepatitis with elevated ALT. April, 44.

Keeping personal values out of predictive values. July/August, 39.

Nondisease sources of variation. July/August, 60.

Is your training tailored?

Ours is.

Coulter training and continuous education. A vital part of your purchase or lease of any Coulter® system. And each individual product has its individually tailored training program.

For example, when your lab acquires an S-PLUS system your personnel will come to the training ...the full resources of our education center in Miami Lakes.

When your lab acquires an S series system, the training will come to your personnel. Tailored, easy-to-follow AV and teaching programs. And, the programs remain in your lab.

Plus Coulter field education coordinators and field technical reps, troubleshooting guides, regional seminars, and an automatic subscription to the Coulter technical mailing service.

Automated S-PLUS and S series systems. Compatible diagnostics. Tailored training. On-line, on-time service. Flexible financing. All from Coulter...the leader in hematology for over 25 years. Call toll-free: 800-526-6932 (In Florida 800-432-6518 Ex. 2723).

Is your service on-line and on-time?

Ours is.

Coulter customer service. It's real service...not lip service. When a Coulter® system is installed in your lab, you become part of our nationwide service program. Should a problem arise, there's a problem-solver a toll-free call away. Usually with a solution that gets your instrument up to speed within hours.

We do it with people. We do it with computer-assisted diagnostics. We do it anyway that's needed to keep your instrument performing.

And we do it with the CARDS™ remote diagnostic system—our instrument-to-computer direct telephone link. It brings hands-off, on-line troubleshooting to your laboratory.

Automated S-PLUS and S series systems. Compatible diagnostics. Tailored training. On-line, on-time service. Flexible financing. All from Coulter...the leader in hematology for over 25 years. Call toll-free: 800-526-6932 (In Florida 800-432-6518 Ex. 2723).
